

Accessory Buildings

The City of Manistee requires a [Land Use Permit](#) for accessory buildings even if a [building permit](#) is not required. If you are interested in adding an accessory building that is not attached to a permanent foundation the State Building Inspector has advised that the building needs to be secured through the installation of anchors. This is to prevent the structure from blowing over and causing damage to the owners and/or neighboring properties.

Examples of Storage Shed Anchor Kits available at most building supply stores.

We don't want to see this happen to you!
